

## FIRE LORE

**Tinder** from *dead* twigs found on the lower branches of trees and shrubs that snaps off easily when bent. No green wood!

**Kindling** should be dry, don't gather wet wood from the forest floor. Look for branches that are dead and down, not on the tree.

**Fuel** should be dry, split larger wood if possible and have a good sized stack on hand before you light the fire.

### TINDER

Around the size of a pencil lead.

No shorter than your outstretched hand

Enough to fill a circle made with your hands

### KINDLING

No thicker than your thumb.

About as long as your elbow to your fingertips

Enough for a generous armload

### FUEL

About as thick as your wrist

About as long as your arm

A stack about as high as your knee
